

We started by racing.

Friday night. Claude in full throttle.
Ship first, ask later. It worked — for a while.

- Mario
- Antonio

● TEAM 6 · THE BAZAAR

▲ 1ST PLACE

Speed wasn't our bottleneck. Our decisions were.

"If you have 60 minutes, spend 55 thinking and 5 executing."

— Luis · Causa Prima talk

#1

#2

· most of the day at the top

Data over guesswork.

HIDDEN EDGE FOUND

One dealer switched the card in **70%** of its sales across all teams. Our agents verify the exact card before every accept — and flag the trick.

01 · OBSERVE

Observe

8,000

public market events

Every offer, deal and pack opening — from every team.

02 · LEARN

Learn

450

negotiations analysed

154 real deals · **17** rival profiles.
Replays of real sessions.

03 · DECIDE

Decide

0

LLM calls at runtime

Deterministic agents. Every decision logged with its reason.

04 · PROTECT

Protect

0

offers past our private limit

Atomic cross-process locks.
Exact-card checks. Never trade below value.

We didn't try to **overpower** the game.
We tried to **understand it better than everyone else.**

The system behind the strategy.

Multiple agents. Shared intelligence.
One decision layer.

ENGINEERING + DISCIPLINE

Built in **48 hours.** Built to last.

API SPEND · THOUGHT FIRST,
THEN EXECUTED

We used Claude **aggressively** — never **carelessly**. We optimized the game *and* how we built for it.

“CONNECT THE DOTS” – MAEX, CAUSA PRIMA

Connect the **dots.**

Claude gave us speed.

The market gave us data.

We connected them into better decisions.

**We came to build the fastest
agent.
We leave with one that learns
before it acts.**
